January 2013: FM 1709/Northwest Highway

A dark, low-angle photograph of a construction site at dusk or dawn. In the foreground, a large piece of construction equipment, possibly a piling rig, is visible. In the background, a bridge structure is visible under construction. The overall scene is dimly lit, with some lights from the equipment and the bridge providing illumination.

37 lane miles left

Out of 152 lane miles

3.4 million CY
Out of 3.6 million cubic yards

An aerial photograph of a large highway interchange with multiple overpasses and ramps, surrounded by some commercial buildings and parking lots. The image is darkened to serve as a background for the percentage text.

85%

A large group of construction workers, mostly men, are gathered in a large industrial building, possibly a warehouse or a construction site. They are wearing yellow hard hats and high-visibility safety vests. The workers are standing in many rows, filling the space. In the background, there are large white roll-up doors and some yellow construction equipment. The overall atmosphere is one of a large-scale project or event.

Thank you!
